Walking speed when turning right!

Adjust mirrors before starting the vehicle.

Cologne police ask for your attention:

- If turning right with a motor vehicle over 3.5 T Gross Vehicle Weight you may drive at walking speed, i. e. at a maximum of 10 km/h.
- Walking speed must be maintained until your vehicle (including a trailer or semi-trailer) has completely cleared the intersection or junction area.
- Watch traffic carefully prior to turning and be sure to set the indicator early.
- Keep an eye on the right hand traffic and the traffic behind you while waiting at the traffic light. This includes people on sidewalks or next to the cab, who might be difficult to see. Walking speed (maximum of 10 km/h) enables you and others to avoid traffic hazards or even traffic accidents!
